B&E Fence & Construction

WHAT MAKES OUR VINYL FENCE BETTER

"The Bitterness Of Poor Workmanship Is Long Remembered After The Sweetness Of A Cheap Price Is Forgotten."

MID-RAIL: All privacy styles with a topper are manufactured with a 2" x 6" double-ribbed mid-rail. This mid-rail with its ridge design is a key component for Interstate's interlocking fence sections.

INTERLOCKING PANELS: Our fence sections use an interlocking construction which locks the vertical boards into the bottom and mid-rail. Our patented 2" x 6" rails have a ridge feature that allows this interlocking system to protect sections from knock-out and wind blowouts.

BOTTOM RAIL: The foundation of all of our PVC sections is our patented 2" x 6" heavy duty bottom rail with an internal steel support. This rail also features a ridge design for interlocking ability. The increased structural strength of this rail reduces sagging, premature failure, and damage from wind.

GATE FRAME: Vinyl gates have always been an area of product failure within the vinyl fence industry. All of our gates are manufactured using our patented 3 1/2" x 3 1/2" gate master frame. Its double walled feature enables hardware screws to penetrate two layers of the frame, as well as doubling the welding surface. This makes for stonger connections and reducing screws from pulling out. This gate master design is structurally stronger than that of our competitor's hollow or narrow gate frames. Bottom Line: *Our gates last longer!*

GATE STOP: This positive stop, patented by Interstate, is an additional piece of gate hardware that you will only find in our system. This stop is an insurance policy for all gates as it absorbs the violent act of the gate slamming and many times help protect against the resulting stress fractures and gate failure. Our gate stop is included with every walk and drive gate.

PRIVACY STYLES | OKLAHOMA SOLID

The Oklahoma Style is the most commonly sold vinyl fence style for its diverse applications and maximum privacy. These sections are manufactured with our full privacy interlocking tongue & groove board and heavy duty 2" x 6" steel reinforced bottom rail. We offer the Oklahoma fence and matching gate in scalloped and crowned designs.

The Oklahoma Privacy styles are available in heights ranging from 3 to 8 feet.

| OKLAHOMA |

WOOD GRAIN AND COLOR FENCES

Our Wood Grain Vinyl Fence is unlike any other PVC fence on the market today! We offer an extensive line of Wood Grain fence styles and gates to satisfy your rear and front yard as well as pool enclosure fence needs. We have developed this product to look like natural wood, with the low maintenance advantages of vinyl. Through advancements in vinyl and acrylic materials, our Wood Grain Vinyl Fence line will last and outperform that of wood and other similar vinyl fence products well into the future. See for yourself how our products will surpass other composite and painted products on the market.

POST & RAIL |

Our Post & Rail is an affordable option for dividing large properties, great along roadways, and as a corral for horses and livestock. Post & Rail styles are available in 2-Rail, 3-Rail, and 4-Rail fencing.

| STANDARD POST & RAIL with added WELDED WIRE |
Offered in 2 – 4 horizontal rails

| CROSS BUCK | Offered in 2 – 3 horizontal rails

| DIAMOND POST & RAIL | Offered in 2 – 4 horizontal rails
Not available in Gray or Cedar Grain

GATES

Interstate's Gates Our gates are known in the fence industry as being one of, if not the strongest PVC gate made. Our patented welded gate profile is square rather than rectangle, which makes it structurally stronger. The wall of the profile is doubled, serving two purposes. First is that it is twice the surface to be welded for double the strength. Second is the gate hardware is secured into two walls rather than just one wall of PVC. All gates include our patented Positive Gate Stop to help protect the gate and latch in case of a hard slam. Be sure to always leave your gates closed. Please ask the sales representative at your home to show you the sample gate corner and ask other companies to show you their gate.

ARBORS |

An Arbor is a great addition to any entranceway and can accent your fence or can stand on their own. Our Arbors are offered with both diagonal and square lattice side panels as well as custom side panel designs. Arbors are structurally strong enough to hang a walk gate and can be custom built to fit most gate openings. Available in stock sizes of 3', 4' and 5' wide. As our standard, our Arbors are built with two heavy duty posts.

DECORATIVE UPGRADES

We welcome you to add something different to your fence to make that curb appeal even more appealing. We have plant hangers that can hang from a post, as well as ones that hang from privacy or semi-privacy sections (without toppers). The Deco Rail adds a bit more depth to the look of the fence. Fence Certs come in many styles, as well as any letter initial to represent the family name.
